

ENVIRONMENTAL POLICY STATEMENT

Rev N January 2022

Creagh Concrete Products Ltd. recognises that good management includes environmental matters and will ensure that environmental protection and the prevention of pollution as central to our business goals and objectives.

We will comply with applicable legislation, regulation, industry codes of practice and other requirements as appropriate.

We will provide for the publication of the environmental policy internally by posting the document on the Company notice boards. This policy will be available externally to all interested parties, (on request) from the administration team.

ISO14001 will be used as the basis to manage our environmental obligations and this system will be used as the basis for the setting and achievement of environmental objectives and targets for the company. These objectives will be communicated widely through the publication of these objectives throughout the company.

We will strive to continually improve upon the environmental performance of our activities and operations, taking into account technical developments, scientific understanding and our customer and community requirements and expectations.

We will develop products and services which have minimal environmental impact and are safe in their intended use. Our considerations will include environmental emissions, waste management, natural resource consumption, and the introduction of energy efficiency practices. Best Available Technology (BAT) will be employed where our works can affect the environment.

We will conduct and support assessment of the environmental impacts of new products and services before starting a new activity or project. We will also work with suppliers and subcontractors to minimise the impact of their operations on the environment. We will strive as a company to ensure that all subcontractors and suppliers used in order to carry out our activities and processes have in place an environmental policy and or a third-party system in place.

We are conscientious that we create an amount of Green House gas emissions with the production of our products and our operations; we also understand that these wasted energies can be used in favour of reproducing fuels in terms of heat generation. We are committed to evaluating our produced Green House Gas emissions, in terms of electricity and fuel usage, with the aim of continually reducing emissions and implementing systems that are more environmentally friendly. We use water efficiently and have adopted methods of re-using water, such as water harvesting and recognise that we must safeguard this resource by recycling where possible to reduce consumption and protect water quality in the natural environment. We strive to ensure that water usage is monitored and restored, that water usage within our production facilities are used and at least 80% of water used is from rain water stored in tanks in our manufacturing processes, this is then recycled and reused in our daily manufacturing processes, with the aim of 100% of the water contained in each product is from a recycled form.

Timber shall be sourced from approved FSC or equivalent suppliers and verification records shall be held on file.

Creagh Concrete Products Ltd. will foster openness and dialogue with employees and all interested parties, anticipating and responding to their concerns about potential hazards and impacts of operations, products, wastes and services.

We will measure our environmental performance by conducting regular environmental audits and assessments of compliance with this policy statement, legal and company requirements.

This policy will be reviewed for continuing suitability and effectiveness regularly as and when required and appropriate.
